

Dear Mr. Watson -

The National Herbarium
is to be rearranged and put
under DuRoi's numbers -
the species are also to be
systematically arranged, they
are now alphabetically placed -

As I shall that work
to do would it help me
to see the large herbaria
of Europe before beginning
the rearrangement? Is there
any harmony in regard
to the arrangement of species?

Could I get any material
advantage out of two months
work in Europe - and

after seeing what is to
be seen at Ken and
South Kensington and
Paris. I could visit but
one or two more which
would be best? Your
judgment about these
matters will help me
ever so much in decid-
ing what were best to do.

Will you be at
